Rescoring a Test in Aware

Why would I rescore a test?

If you have already given the test to students and THEN discovered an error, it is an easy fix!

How do I do it?

In Aware, pull up the test under the Assessments tab

Click on the Questions tab and find the question that needs to be changed. Hover over it and click on the green pencil icon to edit the question/answer

Change the answer as needed (change the answer choice on a multiple choice or type in the correct answer on a griddable, for example)

Go to the Advanced tab and choose Re-score. This will correct ALL data in the system associated with that test and give you immediate results when you look at student scores and analysis.
